

Subject : New design K303S Multicoater

Sheet Ref: D26

The new design K303S Multicoater, launching in early May 2022.

Main Features:-

- Re-designed in 2022, base unit includes fully integrated servo drive and touch screen control
- Easily repeatable samples
- Interchangeable heads
- Multiple coatings simultaneously for comparison
- Maximum coating area 350 x 440mm (meter bar coating head)
- Coating speed 1 - 40m/min
- Available for 100-120V or 220-240V supply voltages

This new design has similarities with the old version including the printing area for all methods of proofing, i.e. bar coating, flexo / gravure printing. The heads are interchangeable and vacuum beds are also available.

The new design offers the following improvements: -

	New K303S design
Motor type	Servo driven-high end, smooth operation at any speed
Speed set by	HMI
Mode switch	HMI plus 2 button operation for safety
Speeds	1-40m/min
Print counter	Yes
